

2019 FALL MAINTENANCE REQUEST FORM

| | |
|-----------------------|--------|
| Name: | Phone: |
| E-mail Address: | |
| Street Address: | |
| City and Postal Code: | |

Please fill out all necessary information and submit with pre-payment by **October 4/2019** and receive a **20% Discount** on your fall services

Shutting your pond down for the season requires minimal maintenance or attention for your water feature all winter. We recommend shutting down the pond after the majority of leaves have fallen. And remember, you cannot restart your pond until the underground pipes have thawed and you have cleaned your bio-falls.

Option 1: Partial Cleanout - \$150 OR \$120 with 20% discount

Depending on your ponds surroundings, a full cleanout may not be necessary. However, make sure you are prepared to keep the majority of debris, especially tree leaves out of your pond by protecting it with a net.

| <input type="checkbox"/> | Partial Cleanout Services - \$150 \$120 with 20% discount applied |
| <ul style="list-style-type: none">✓ Cleanout Skimmer and Biofalls filters✓ Cutback marginal aquatics and lilies✓ Scoop out bulk of leaves that have fallen into pond✓ Clean and/or remove pump(s)✓ Install your floating De-icer (available for purchase)✓ Install your Aerator (available for purchase)✓ Install your Pond Netting (available for purchase)✓ Cold Water Bacteria (available for purchase) | |

Option 2: Full Cleanout Packages

If your pond is in a dense area with lots of deciduous trees a full clean out may be necessary to avoid major build-up of debris over the autumn months. Once the weather starts to warm up in the spring, all of the debris accumulated in the bottom of your pond will start to decompose stressing your fish and ecosystem making it harder to get a good start for the spring.
